

DARDEN PROPERTIES OS

The AI Agent Fleet | 21 scheduled routines, ~50 autonomous runs/day | built on Claude (Cowork) + MCP connectors

Prepared 2026-07-06
Gene Darden - The Darden Group

GOVERNANCE
_SHARED_RULES.md (6 fleet-wide rules): Task-Net · Upgrade Loop · Send Autonomy (draft-first for anything client-facing) · Build Autonomy (green/yellow/red lanes) · Heartbeat (no silent failures) · Week Rhythm (Mon-Fri)
_BUILD_LOG.md - every change logged with a one-line revert _HEARTBEAT.md - every run logs OK / PARTIAL / BLOCKED; Morning Brief flags misses LEDGER.md - append-only lead history (dedupe mem)

CONNECTORS / DATA SOURCES (MCP)
Gmail · Google Calendar · Todoist · Brivity CRM (Chrome today -> API requested) · QuickBooks Online · Buffer (social) · Canva (brand kit) · Make · HeyGen + fal.ai (video) · GitHub Pages (hosting)

Runs locally on a dedicated 24/7 Windows workstation via Claude Code scheduled tasks. External sends are draft-first; auto-send only to Gene's own inbox and explicitly approved lanes.

A DAY IN THE MACHINE + WHERE IT'S GOING

Run schedule (Central time), guardrails, and where the platform fits

THE DAILY RHYTHM

5:00a	Daily marketing engine generates + queues content
5:45a	Inbox triage sweep (labels, routes, drafts) -> hands off
6:00a	Trading cockpit briefing (weekdays)
6:10a	MORNING BRIEF - the one cockpit email (auto-sends)
6:20a	Money Pulse (weekdays, emails only on a problem)
6a-10p	ISA lead sweep every 15 min + SMS/voicemail miner
7:00a Mon	Weekly Pipeline & Forecast + Monday Client Command Sheet
8:00a M-Sa	Daily Opportunity Board (team lead-claim board)
8a-8p	Listing Milestone Engine every 3 hours
8:10a/12:10p/4:10p	Brivity deep sweep (signals, harvest, imports)
7:30a/12:30p/5:30p	Fleet Console refresh -> phone dashboard
midday	Engagement sweep (comment replies, hot-lead flags)
7:00p	ISA Daily Briefing (call list, scoreboard, script A/B)
8:00p	Nightly Deep Dive (client care audit, tomorrow's plan)
Fri	Saturday Spot commercial + Market Minute + trading review
Sun 5p	CEO Sweep - audits everything above
Monthly	Market letter (2nd) + Snowball DCA (1st)

THE NUMBERS

21

scheduled routines

~50

runs / day

2

markets (B'ham + Gulf)

45 / 90

2026 goal: Gene / team

SAFETY MODEL (how we keep it clean)

- Draft-first: nothing client/external auto-sends without an approved lane
- Auto-send allowed only to Gene's own inbox + explicitly greenlit flows
- Every autonomous change logged to _BUILD_LOG.md with a revert line
- Heartbeat log = no silent failures; Morning Brief flags missed runs
- Public pages (Fleet Console) carry no PII - first name + initial only
- TCPA guardrails on texting: inbound-only, send windows, opt-out honored

ROADMAP (next 30-60 days)

- Brivity API migration (request sent) - retires Chrome scraping
- Speed-to-lead Phase 2: webhook -> ~2-min verified lead response
- QBO catch-up (~830 txns) -> true P&L -> tax strategist agent
- Lead magnets: True Readiness Scorecard + Pricing Playbook
- Phase 2 channels: TikTok + LinkedIn; Phase 3: newsletter/blog

WHERE BRIVITY + PLACE FIT

- The whole machine rides on Brivity: smart filters, Opportunities, drips, activity signals, and the 470K-contact database
- API access request in flight (account owner) - would retire our browser automation and 10x reliability
- Webhook on new-lead events = ~2-minute verified lead response
- Happy to share everything here for PLACE product development
